

CyanoFORCE 15SC Residual Insecticide

ACTIVE CONSTITUENT: 15 g/L ALPHA-CYPERMETHRIN

GROUP 3A INSECTICIDE

A residual insecticide for control of ants, cockroaches, silverfish, fleas, flies and spiders in domestic, industrial and public health situations.

TO BE USED BY LICENSED PEST CONTROL OPERATORS ONLY

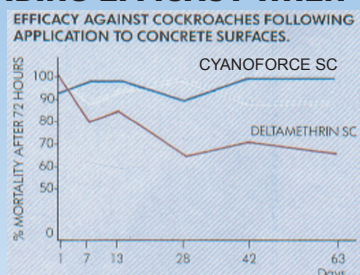

CONTENTS: 2.5L

DIRECTIONS FOR USE

PEST	SITUATION	STATE	RATE	CRITICAL COMMENTS
German cockroach	Domestic, industrial and public health situations	All States	40 mL in 1 L water	For crawling insects, apply as a coarse low pressure spray to areas where pests frequent. For flying insects, apply as a surface treatment using a fine spray to wet the surface.
Australian cockroach, American cockroach, smoky brown cockroach, oriental cockroach, fleas, flies, silverfish, spiders			Initial treatment Or Extended control Or Heavy infestations: 40 mL in 1 L water Maintenance treatment Or Short term control Or Light infestations: 20 mL in 1 L water	Apply 5 L of diluted spraymix per 100 square metres. If a different water rate is required, adjust the dilution rate to ensure that 2 mL of CyanoFORCE is applied per square metre for initial treatments, extended control or heavy infestations; and that 1 mL of CyanoFORCE is applied per square metre for maintenance treatments, short term control or light infestations. Add a non-ionic surfactant at the registered label rates to improve spreading on hard to wet surfaces.

OUTSTANDING EFFICACY WHEN COMPARED TO DELTAMETHRIN ON COCKROACHES

CYANOFORCE SC - KNOCKDOWN	Days after treatment	
	25	64
Surface	Mean 100% knockdown time (mins, secs.)	
Glass	2.52	13.21
Wood	5.55	18.42
White washed	6.05	18.38
Breeze-block	6.38	12.49
Weathered brick	7.28	16.19
Concrete	8.13	8.41
