

CHAINDRITE PERMFORCE DUST INSECTICIDE

ULTRA-FINE DUST
ADVANCED DUST FORMULATION

PRODUCT BROCHURE

PRODUCT DETAILS

Active Constituents:	Permethrin 10 g/Kg
Inert ingredients:	Powder substrate
Formulation type:	Ready to use Dustable Powder
Insecticide Mode of Action:	Contact killing insect dust
Target Pests:	Broad spectrum label
APVMA Registration Number:	62664

CHAINDRITE PERMFORCE DUST is a convenient ready to use product ideal for situations where a liquid cannot be used, such as roof and wall voids

CONTROL OF INSECTS

CHAINDRITE Permforce DUST contains Permethrin 1% and an ultra fine matrix substrate as its carrier. The ultra fine carrier formulated in Permforce DUST enables the Permethrin to flow freely and deeper into cracks and crevices than competitor products, ensuring supreme coverage and rapid knockdown of target insects.

Permethrin is a synthetic pyrethroid that is highly potent to insects at very low rates. Permethrin has a long history of safe use in household products in Australia and overseas and has relatively low mammalian toxicity and minimal environmental impact.

APPLICATION

PESTS	APPLICATION	HOW TO USE
Cockroaches & Silverfish ants, fleas, bedbugs	10 g/m ² applied with a powder blower	See the label for directions to use and entire product label claims
European Wasps	125 - 250g per nest
